

Sara García

PROFESSIONAL SUMMARY

Frontend Developer and UX/UI Designer with a multidisciplinary background in education, graphic design, 3D animation, and interactive web experiences. I build responsive, polished, and user-centered interfaces using React, Next.js, TypeScript, Tailwind CSS, and modern frontend workflows. My strength is bridging design and development: translating product goals, visual systems, and user flows into scalable components and production-ready interfaces.

EDUCATION

Master's Degree in Education ·
Pontificia Universidad Católica
Madre y Maestra (PUCMM) · 2019

SKILLS

Frontend:
React · Next.js · TypeScript ·

PROFESSIONAL EXPERIENCE

Frontend Developer & UX/UI Designer

Orkapi Technology · Dominican Republic · 2023 – Present

- Build and refine responsive frontend interfaces for corporate, gaming, and digital product experiences.
- Translate design direction into structured, maintainable, production-ready components and page layouts.
- Support both frontend development and UX/UI design decisions, improving usability, visual hierarchy, and interaction polish.
- Develop reusable UI sections and responsive layouts using modern frontend practices.
- Collaborate with internal teams to improve code organization, component reuse, and branded product presentation.

Freelance / Independent Frontend Work

Garafly / Personal Projects · Remote

- Design and develop web, branding, portfolio, and interactive product concepts that combine frontend development with visual design.
- Create UX/UI flows, reusable components, visual systems, and motion-friendly interfaces.
- Explore creative frontend experiences using React, Next.js, TypeScript, Tailwind CSS, Three.js, and animation tools.

LANGUAGES

Spanish: Native

English: Professional / Bilingual working proficiency
